## ACCEPTABLE USE POLICY

This Acceptable Use Policy (AUP) governs your use of the Internet services (Service) provided by Wilson Communications (ISP). The AUP applies to all users of the ISP's Internet services. A 'user' is anyone who makes use of the ISP for Internet connectivity, including, but not limited to, dial-in, remote users, and ISP staff and administration. All users are expected to abide by the provisions laid out in this document, without exception. The ISP is the final authority over user activity. This acceptable use policy attempts to summarize what the ISP deems acceptable and unacceptable uses of its services. Except where explicitly stated, violation of this acceptable use policy may be considered breach of contract, and may result in termination of service. The ISP reserves the right to restrict or terminate service at any time and for any reason.

Generally, ISP does not monitor or edit the content posted by users of the Service or other Internet services that may be available on or through the Service (e.g., newsgroups, chat rooms, message boards, etc.). However, ISP and its agents reserve the right at their sole discretion to remove any content that, in ISP's judgment, does not comply with the AUP or is otherwise harmful, objectionable, or inaccurate. ISP is not responsible for any failure or delay in removing such content.

In addition, ISP may cooperate with legal authorities and/or third parties in the investigation of any suspected or alleged crime or civil wrong. Your violation of this AUP may result in the suspension or termination of either your access to the Service and/or your ISP account. You agree to indemnify, defend, and hold ISP harmless from any claims resulting from your use of this service, which damages you or another party. At our sole discretion, we may revoke your access for inappropriate usage. Use of any information obtained via the Service is at your own risk. ISP is not responsible for the accuracy, quality, or content of information obtained through the Service.

The following constitute violations of ISP's AUP:

- (A) Using the Service to gain unauthorized access to any computer systems.
