

## **Transparency Disclosures Required by the FCC's Restoring Internet Freedom Order**

Wilson Telephone Company, Inc. and Wilson Communication Company, Inc. dba Wilson Communications (Provider) is providing the following disclosures pursuant to the Federal Communications Commission's Open Internet rules found in Part 8 of Title 47 of the Code of Federal Regulations.

### **Network Management Practices**

#### **Blocking & Throttling**

Provider does not block or throttle any lawful content, applications, service, user, or non-harmful devices.

#### **Prioritization**

Provider does not prioritize traffic to benefit an affiliate or in exchange for consideration, monetary or otherwise.

#### **Congestion Management**

Provider does not use any congestion management techniques on network traffic.

#### **Application-Specific Behavior**

Provider does not block or rate-control specific protocols or protocol ports, modify protocol fields in ways not prescribed by the protocol standard, or otherwise inhibit or favor certain applications or classes of applications.

#### **Device Attachment Rules**

Provider requires all devices used on the Provider's network to conform to publicly available industry standards and be non-harmful to the Provider's network.

#### **Security**

Provider does not restrict its customers from access to all lawful content, services, and applications available on the Internet. Provider uses industry standard tools and generally accepted practices to help protect our e-mail customers from spam, phishing, and other unwanted or harmful content delivered through Provider's e-mail service. In the instances where these tools and practices identify e-mail content as harmful or unwanted, the content may be prevented from reaching customers, or customers may be permitted to identify or inspect content to determine if it is harmful or unwanted. Provider does not protect customers from other unwanted or harmful online content, and encourages users to implement sufficient security measures for all devices connected to Provider's network.

## **Performance Characteristics**

### **Service Description**

Provider offers broadband ISP services using both Fiber-to-the-Premise and DSL technologies. The advertised speed of Provider's Internet service is generally the maximum achievable speed of the selected service. The actual speeds and latency achieved with Provider's Internet service offerings are suitable for certain real-time applications. Provider offers a speed test to measure actual speeds for any user or customer. It can be accessed at: <http://wilsontelephone.speedtestcustom.com> .

### **Impact of Non-Broadband Internet Access Service Data Services**

Provider does not Non-Broadband Internet Access Service Data Services as defined in the transparency rules.

## **Commercial Terms**

### **Pricing**
